December 31, 1986

**RECENT ADVANCES IN ELECTRON
AND LIGHT OPTICAL IMAGING
IN BIOLOGY AND MEDICINE^a**

Editor
ANDREW P. SOMLYO

CONTENTS

Overview. By ANDREW P. SOMLYO.....	ix
In Memoriam Robert Day Allen (1927-1986). By D. LANSING TAYLOR	xi
Part I. Cryoelectron Microscopy, Freeze-Etching, and Image Processing	
The Use of Cryoelectron Microscopy in Elucidating Molecular Design and Mechanisms. By NIGEL UNWIN	1
Recent Advances in Cryoelectron Microscopy. By E. ZEITLER and F. ZEMLIN	5
Quick-Frozen Microtubules Studied by Cryoelectron Microscopy and Image Processing. By ECKHARD MANDELKOW and EVA-MARIA MANDELKOW	13
Studies of Eukaryotic Flagella by Cryoelectron Microscopy. By JOHN M. MURRAY	24
Image Analysis of the Ca ²⁺ -ATPase from Sarcoplasmic Reticulum. By KENNETH A. TAYLOR, MING-HSIU HO, and ANTHONY MARTONOSI.....	31
The Density and Disposition of Ca-ATPase in <i>In Situ</i> and Isolated Sarcoplasmic Reticulum. By CLARA FRANZINI-ARMSTRONG, DONALD G. FERGUSON, LORIANA CASTELLANI, and LINDA KENNEY.....	44
Metal Shadowing and Decoration in Electron Microscopy of Biological Macromolecules. By WOLFGANG BAUMEISTER, REINHARD GUCKENBERGER, HARALD ENGELHARDT, and CHRISTOPHER L. F. WOODCOCK.....	57
A New Method for Three-Dimensional Reconstruction of Single Macromolecules Using Low-Dose Electron Micrographs. By JOACHIM FRANK, MICHAEL RADERMACHER, TERENCE WAGENKNECHT, and ADRIANA VERSCHOOR	77
Actin and Flagellar Filaments: Two Helical Structures with Variable Twist. By SHLOMO TRACHTENBERG, DAVID STOKES, ESTHER BULLITT, and DAVID DEROSIER.....	88

^aThe papers in this volume were presented at a conference entitled Recent Advances in Electron and Light Optical Imaging in Biology and Medicine, which was held by the New York Academy of Sciences in New York City on March 18-21, 1986.

The Three-Dimensional Structure of the Actin Filament Revisited. By UELI AEBI, ROBERT MILLONIG, HOPE SALVO, and ANDREAS ENGEL.....	100
The Structure of Membrane Bound Cytochrome <i>c</i> Oxidase. By TERRENCE G. FREY and TAN CHANG	120
Structural Studies of Na,K-ATPase. By MANIJEH MOHRAZ, MOVIEN YEE, and P.R. SMITH	131
Electron Microscopic Studies of Chromosomal Proteins. By MICHAEL BEER, JACOB VARKEY, JOHN BRANTLEY, and KRISHNA NIYOGI	140
Part II. High and Intermediate High Voltage Electron Microscopy	
Potential for High-Resolution Electron Crystallography at Intermediate High Voltage. By WAH CHIU, TZYY-WEN JENG, LAURA L. DEGN, and B.V. VENKATARAM PRASAD	149
The Usefulness of the High Voltage Electron Microscope in Biomedical Ultrastructure Analysis. By DONALD F. PARSONS	157
The Extraction of Three-Dimensional Information from Stereo Micrographs of Thick Sections Using Computer Graphics Methods. By LEE D. PEACHEY	161
Four-Dimensional Microscopy of <i>Ascaris</i> Sperm Motility. By JAMES B. PAWLEY, SOL SEPSENWOL, and HANS RIS.....	171
Part III. Scanning Transmission Electron Microscopy	
Mapping the Domains of Molecules and Complexes by Mass and Heavy Atom Loading. By JAMES F. HAINFELD and JOSEPH S. WALL	181
Radial Density Profiles of Macromolecular Filaments Determined from Dark-Field Scanning Transmission Electron Micrographs: Improvements in Technique and Some Applications. By ALASDAIR C. STEVEN, TODD A. SIMPSON, BENES L. TRUS, PAUL S. FURCINITTI, JAMES F. HAINFELD, and JOSEPH S. WALL	188
Z-Contrast in Biology: A Comparison with Other Imaging Modes. By E. KELLENBERGER, E. CARLEMALM, W. VILLIGER, M. WURTZ, C. MORY, and CH. COLLIE.....	202
Part IV. Analytical Electron Microscopy: Electron-Probe Analysis	
Electron-Probe X Ray Microanalysis of <i>In Situ</i> Calcium and Other Ion Movements in Muscle and Liver. By A. V. SOMLYO, M. BOND, H. SHUMAN, and A. P. SOMLYO	229
Analytical Electron Microscopy in the Study of Biological Systems. By DALE E. JOHNSON	241
Electron-Probe X Ray Microanalysis of Transepithelial Ion Transport. By ROGER RICK, ADOLF DÖRGE, FRANZ X. BECK, and KLAUS THURAU.....	245
Resolution of Sarcolemma and Sarcoplasmic Reticulum in Electron-Probe X Ray Microanalysis of Cardiac Muscle. By JOHN MCD. TORMEY and ELLYN S. WHEELER-CLARK	260
Electron-Probe Analysis of Cultured Cells. By C. LECHENE	270
Intracellular Structure and Elemental Analysis in Rapid-Frozen Neurons. By S. BRIAN ANDREWS and THOMAS S. REESE	284

Part V. Analytical Electron Microscopy: Electron Energy-Loss Spectroscopy and Photoelectron Microscopy

Electron Energy-Loss Spectroscopy: Quantitation and Imaging. <i>By H. SHUMAN, C.-F. CHANG, E.L. BUHLE, JR., and A.P. SOMLYO.....</i>	295
Electron Energy-Loss Spectroscopy Analysis and Imaging of Biological Specimens. <i>By CHRISTIAN COLLIEUX.....</i>	311
Scanning Transmission Electron Microscope (STEM) Elemental Mapping by Electron Energy-Loss Spectroscopy. <i>By R.D. LEAPMAN.....</i>	326
Elemental Mapping by Energy Filtration: Advantages, Limitations, and Compromises. <i>By F.P. OTTENSMAYER.....</i>	339
Electron Energy Analysis in Emission Microscopy. <i>By D.W. TURNER, I.R. PLUMMER, and H.Q. PORTER.....</i>	354
Immunophotoelectron Microscopy of the Cell Surface and Cytoskeleton. <i>By KAREN K. HEDBERG and O. HAYES GRIFFITH.....</i>	372

Part VI. Light Microscopy and X Ray Microscopy

Light Microscopy—A Modern Renaissance. <i>By WATT W. WEBB.....</i>	387
Computer-Aided Stereoscopic Video Reconstruction and Serial Display from High-Resolution Light-Microscope Optical Sections. <i>By SHINYA INOUÉ and THEODORE D. INOUÉ.....</i>	392
Three-Dimensional Imaging by Confocal Scanning Fluorescence Microscopy. <i>By G.J. BRAKENHOFF, H.T.M. VAN DER VOORT, E.A. VAN SPRONSEN, and N. NANNINGA.....</i>	405
Confocal Light Microscopy. <i>By T. WILSON.....</i>	416
Applications of Tandem Scanning Reflected Light Microscopy and Three-Dimensional Imaging. <i>By ALAN BOYDE.....</i>	428
In Vivo Microscopy Using the Tandem Scanning Microscope. <i>By M. PETRAN, M. HADRAVSKY, J. BENES, and A. BOYDE.....</i>	440
Scanning Optical Microscopy at $\lambda/10$ Resolution Using Near-Field Imaging Methods. <i>By M. ISAACSON, E. BETZIG, A. HAROOTUNIAN, and A. LEWIS...</i>	448
X Ray Microscopy—State of the Art and Expected Developments. <i>By D. RUDOLPH, G. SCHMAHL, B. NIEMANN, W. MEYER-ILSE, and J. THIEME.....</i>	457
Microanalysis with a Soft X Ray Scanning Microprobe. <i>By C. JACOBSEN, J.M. KENNEY, J. KIRZ, I. McNULTY, R.J. ROSSER, F. CINOTTI, H. RARBACK, and D. SHU.....</i>	463
Index of Contributors.....	471
